## Dear Shareholders,

I have great pleasure in extending a warm welcome to you all to the Eighth Annual General Meeting of your Bank.

The Annual Report, including the Audited Accounts of the Bank for the year ended March 31<sup>st</sup> 2014 has been in your hands for some time. With your consent, I shall take them as read.

The Financial year FY2014 was challenging with moderation in economic growth impacting the performance of the Banking sector. The Bank had to proactively respond to the challenges in order to protect the stakeholders' interest. Ladies & Gentlemen, before I take you through the details of the financial performance of your bank in FY2013-14, I would like to give you a brief overview of the developments in the recent past, both at the global and domestic level, which has had an impact on the economy in general and the banking system, in particular.

## Global Economic Scenario

World over, currencies were affected by the announcement of the US tapering programme, more so the developing economies currencies. The fear of the tapering programme caused funds to move out of the emerging markets and weakened them. Conditions have, however, since improved and there has been some regaining of ground.

Global economic activity is likely to strengthen in 2014, led by the growth in the advanced economies, especially the US. Global growth in 2014 is likely to be 3.5 per cent, 0.5 per cent higher than in 2013.

## Indian Economic Scenario

In FY2014, the Indian economy continued to witness the challenging twin problem of prolonged high inflation and low growth. This got reflected in lower business sentiments, reduced investments and lowered consumption.

Economic activity weakened in FY 2013-14, as the protracted slowdown in Industries led to a moderation in growth of the Services sector. The GDP growth for FY 2014 at 4.7 per cent remained below 5 per cent for two consecutive years.

However, the growth in FY 2014 was primarily on account of revival in agriculture growth on the back of steady monsoons and robust growth in financial and business services.

The Monetary policy stance of the Reserve Bank has been driven by the imperatives of keeping inflation in check while supporting growth revival and managing the external economic situation. While WPI inflation moderated from a high of 7.52 per cent in November 2013 to 5.7 per cent in March 2014, Retail inflation as measured by the CPI ended at 8.31 per cent in March 2014 from 11.16 per cent seen in November 2013. However, CPI inflation has inched up in April 2014 to 8.59 per cent.

Reserve Bank hiked the Key policy rates thrice by 25 bps during the year to take the Repo rate to 8 per cent. RBI began the process of calibrated withdrawal of some of the exceptional liquidity measures undertaken by it to tackle exchange market pressures noting the improvements in the external environment in September 2013 - MSF was reduced by 125 points to 9 per cent and the minimum daily maintenance of the CRR was reduced from 99 per cent of the requirement to 95 per cent. Considering the evolving liquidity conditions, RBI provided additional liquidity through term repos of 7-day and 14-day tenor equivalent to 0.25 per cent of the Net Demand and Term Liabilities (NDTL).

Aggregate Deposits and Credit of the banking system saw a moderate growth of 14.6 per cent and 14.3 per cent respectively during the year.

Against the above backdrop in economic and banking scenario, I present the performance of your Bank in FY 2013-14.

## Business and Financial Achievements

You would be happy to know that your Bank's Global Business grew by 15.1 per cent during the year to reach ₹ 286,633 crore. While Deposits grew by ₹ 20,295 crore or 14.3 per cent to ₹ 162,275 crore, Credit grew by ₹ 17,203 crore or 16.1 per cent to ₹ 122,209 crore.
