Dear Shareholders,

It gives immense pleasure in welcoming you all to the Ninth Annual General Meeting of your Bank.

The Annual Report, including the Audited Accounts of the Bank for the year ended March 31st 2015 has been in your hands for some time. With your consent, I shall take them as read.

I would like to express my deep sense of gratitude for your continuous trust, support and loyalty which has enabled the Bank to complete 108 years.

FY2014-15 was the year of recovery and turnaround as brighter prospects emerged for the economy which is now estimated at USD 2.1 trillion. Economy was largely relieved of the vulnerabilities associated with the economic slowdown viz., persistent inflation, elevated fiscal deficit, slackening domestic demand, external account imbalances and fluctuating value of the Rupee.

For the Banking sector, FY 2014 - 15 was challenging due to slower pace of growth in Credit, rise in stressed assets and moderation in profit due to higher provisioning.

The Bank had proactively responded to the challenges in order to protect the interest of its stakeholders. Ladies and Gentlemen, before I take you through the details of the financial performance of your Bank during FY 2014-15, I would like to give a brief overview of the developments in the recent past, both at the global and domestic level, which has had an impact on the economy in general and the banking system, in particular.

Global Economic Scenario

World over, growth remained moderate with uneven prospects across the main countries and regions. As per International Monetary Fund (IMF) forecast for 2014-15, global growth was projected at 3.5 per cent in 2015 and 3.8 per cent in 2016.

While growth in emerging markets softened, reflecting an adjustment to diminished medium-term growth expectations and lower revenues from commodity exports, outlook for advanced economies showed signs of improvement, owing to the boost of disposable incomes from lower oil prices, accommodative monetary policy stances and moderate fiscal adjustment. Geopolitical situations continued to pose threats and risks of disruptive shifts in assets prices remained relevant.

Indian Economic Scenario

In FY2014-15, Indian economy rebounded with positive economic outlook amidst uncertainties that engulfed advanced and emerging economies. Both, decline in inflation and recovery in growth were seen in FY 2014-15.

As per the estimates of Central Statistical Organisation (CSO), GDP at constant (2011-12) prices in the year 2014-15 is estimated at ₹106.44 lakh crore, showing a growth rate of 7.3 per cent. Of which, manufacturing sector registered the higher growth of 7.1 per cent in FY 2014-15 as against 5.3 per cent in 2013-14 as per new series.

In the first three quarters of FY 2014-15, RBI had a strong disinflationary stance focusing on controlling inflation measured in terms of CPI or Retail inflation. However, as the data indicated steady fall in inflation after the measures taken in monetary policies, RBI cut its key Repo rate by 50 basis points in Q4 2014-15.

Monetary Policy Framework envisages the conduct of monetary policy around a nominal anchor, numerically defined as below 6 per cent CPI inflation for 2015-16 and 4 per cent along with the range bound of plus/minus 2 per cent for all subsequent years.

This flexible inflation targeting framework greatly enhances the credibility and effectiveness of monetary policy and particularly the pursuit of inflation targets that have been set.

In the banking industry with credit and deposits growth moving broadly in tandem, liquidity conditions in the system remained comfortable. Aggregate Deposits and Credit of the banking system saw a moderate growth of 11.4 per cent and 9.5 per cent respectively during the year.

Against the above backdrop in economic and banking scenario, I present the performance of your Bank in FY 2014-15.

Business and Financial Achievements

I am happy to share with you, that the Bank's consistent focus on bottom line has been rewarded by the Government of India with infusion of additional capital of ₹ 280 crore based on the Bank's performance on Return on Assets and Return on Equity.
