# f. Any restrictions or impediments on transfer of funds or regulatory capital with in the banking group:

There is no restriction or impediments on transfer of funds or regulatory capital within the banking group.

# Table DF - 2: Capital Adequacy

## **Assessment of Capital Adequacy:**

- (a) Bank maintains capital to protect the interest of depositors, general creditors and stake holders against any unforeseen losses.
  - As per the RBI guidelines, Banks have to maintain a Minimum Common Equity Tier 1 (CET 1) of 7.375% (including Capital Conservation Buffer of 1.875%) and minimum CRAR of 10.875%. Bank maintains Common Equity Tier 1 (CET 1) of 11.27 %( Solo), 11.59% (Consolidated) and CRAR of 15.71 %( Solo),16.02 % (Consolidated).
- (b) In line with RBI guidelines, Bank has adopted following risk management approaches for assessing the capital adequacy:

> Credit Risk: Standardised Approach

➤ Market Risk: Standardised Duration Approach

Operational Risk: Basic Indicator Approach

- (c) Bank projects capital for the next 5 financial years based on business projections, policy guidelines, macro-economic scenarios, risk appetite etc
- (d) Under Pillar II, Bank considers following risks while assessing / planning capital:
  - Credit Concentration Risk
  - Interest Rate Risk in the Banking Book
  - Liquidity Risk
  - Settlement Risk
  - Compliance Risk
  - Reputational Risk
  - Model Risk
  - Country Risk
  - Compensation Risk
  - Legal Risk
  - Group Risk

- Underestimation of Credit Risk under Standardised Approach
- Pension Obligation Risk
- Off-Balance sheet exposure Risk
- Technology Risk
- Outsourcing Risk
- Human Resources Risk
- Residual Risk
- Strategic Risk
- Un-hedged Foreign Currency Exposure Risk

(e) Bank also periodically undertakes stress testing in various risk areas to assess the impact of stressed scenario or plausible events on asset quality, liquidity, interest rate, derivatives and forex on its profitability and capital adequacy.

A comprehensive stress testing framework is put in place. Bank conducts stress test on quarterly basis based on scenarios prescribed by RBI as well as bank specific scenarios The Bank has also conducted stress testing under Covid 19 pandemic to assess the plausible losses on Bank's balance sheet during the pandemic. The result of the same is placed to Credit Risk Management Committee (CRMC)/Risk Management Committee (RMC) /Board.

# Quantitative disclosures (as per Basel III guidelines)

(a) Capital requirements for credit risk:

(₹ in Million)

Particulars	Solo (Global)	Consolidated
Portfolios subject to standardized approach	2,75,278.55	2,75,350.42
Securitization exposures		

(b) Capital requirements for market risk:

Standardized duration approach

(₹ in Million)

Particulars	Solo (Global)	Consolidated
Interest Rate Risk	8,700.50	8,700.50
Foreign Exchange Risk (including gold)	90.00	90.00
Equity Risk	3,464.95	3,598.44
Total	12,255.45	12,388.94

(c) Capital requirements for operational risk:

(₹ in Million)

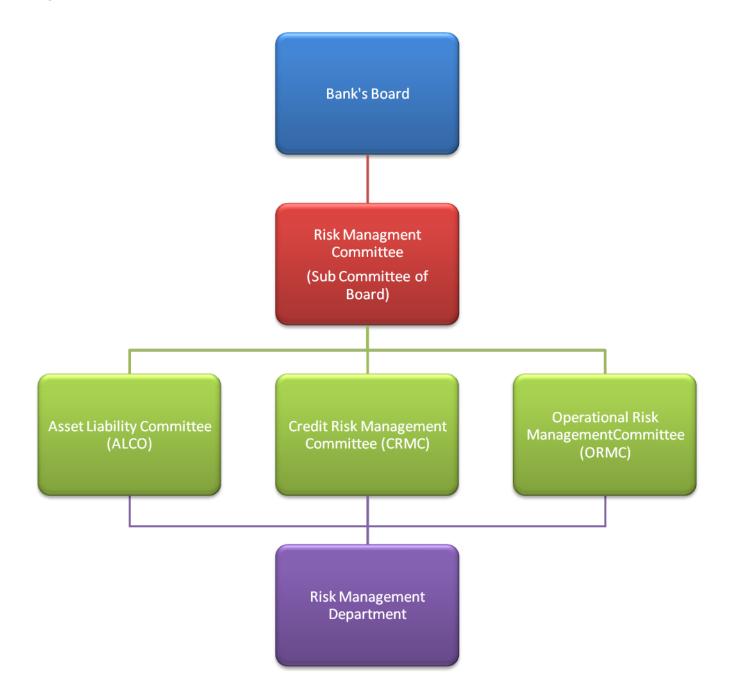

Particulars	Solo (Global)	Consolidated
Basic Indicator Approach	23,718.06	23,771.48

(d) Common Equity Tier 1 (CET 1), Tier 1 and Total capital ratio (as per Basel III guidelines):

Particulars	Solo (Global)	Consolidated
Common Equity Tier 1 (CET 1)	11.27%	11.59%
Tier 1 Capital Adequacy Ratio	11.93%	12.25%
Total Capital Adequacy Ratio	15.71%	16.02%

# **Organisation Structure:**

#### Risk Management Architecture:

The Bank's risk management framework is based on clear understanding of various risks, disciplined risk assessment and measurement procedures and continuous monitoring. An independent Risk Management Department is functioning for effective Enterprise-Wide Risk Management and responsible for assessment, monitoring and reporting of risk exposures across the bank. All the risks the Bank is exposed to, are managed through following three committees viz.,

- (i) Asset Liability Committee (ALCO)
- (ii) Credit Risk Management Committee (CRMC)
- (iii) Operational Risk Management Committee (ORMC)

These committees work within the overall guidelines and policies approved by the Board.

The Bank has put in place various policies to manage the risks. To analyze the enterprise-wide risk and with the objective of integrating all the risks of the Bank, an Integrated Risk Management policy (including Disclosure, Reputational & Strategic Risk Management) has also been put in place. The important risk policies comprise of Credit Risk Management Policy (part of Credit Policy), Asset Liability Management Policy, Policy on Market Risk Management, Operational Risk Management Policy, Internal Capital Adequacy Assessment Process (ICAAP) Policy.

All the policies are reviewed at a minimum on annual basis by Risk Management Committee (RMC)/Board. In order to disseminate the risk management concepts and also to sensitize the field level functionaries, the relevant policies are circulated to the branches, in addition to imparting training at the Bank's training establishments.

### **Credit Risk:**

Risk Management Systems are in place to identify and analyze the risks at an early stage and manage them by setting and monitoring prudential limits besides taking other corrective measures to face the changing risk environment.

#### **Limit Framework:**

In order to limit the magnitude of credit risk and concentration risk, a limit framework has been laid down for following type of exposures:

- Single and group borrower exposure
- Sensitive sector exposure
- Unsecured exposure
- Country-wise exposure
- Internal rating wise exposure
- Term loan exposure
- Industry-wise exposure
- Interbank exposure

These exposure limits are monitored on regular basis and placed to various apex level committees of the Board.

**Rating Model:** All credit proposals are subject to a rigorous credit risk rating/scoring process to support credit decision making as well as to enhance risk management capabilities for portfolio management, pricing and risk based capital measurement.

Software driven rating mechanism is in place to assign the rating to ensure credit quality. The output of the rating models is used in decision making i.e. sanction, pricing and monitoring of credit portfolio. In order to ensure robustness of the rating models, the rating models have been subjected to validation by an external agency.

**Scoring model:** The Bank has entry level scoring models for all the fresh sanctions coming under structured loan products and other loans which are not subjected to Rating Model.

Loan review mechanism and Credit audit system are in place for the periodical review/audit of the large value accounts and bring about qualitative improvements in credit administration of the Bank. In addition, Standard Assets Monitoring Committee reviews the Special Mention Accounts periodically to initiate timely action to prevent slippage of standard assets to non performing assets. As a part of monitoring mechanism, accounts which are downgraded from investment category are identified and monitored closely.

Migration analysis of ratings is done on quarterly basis. Also weighted average rating of industry-wise portfolio of the Bank is done on quarterly basis. Analysis of rating wise distribution of advances is also carried out on quarterly basis.

Adopting best risk management practices, credit proposals (except schematic loan proposals) coming under sanctioning powers of Corporate Office are scrutinised by the Risk Management Department.

#### **Asset Liability Management:**

Asset Liability Management framework facilitates bank to measure, monitor and control liquidity risk and interest rate risk on its balance sheet. This helps in providing suitable strategies for asset liability management. The asset liability management framework consists of the following key components

- Liquidity risk management
- Interest rate risk management
- Balance sheet and Basel III liquidity ratios
- Stress Testing and scenario analysis
- Contingency funding plan

Bank has set in place ALM policy to achieve two primary objectives as listed below:

## Short Term Objective:

- To optimize the Net Interest Margin (NIM) of the Bank
- To provide adequate liquidity
- To manage re-pricing risk

#### Long Term Objective:

• To maximize the shareholder's wealth

Asset Liability Management is the function of Asset Liability Committee (ALCO). It operates under the guidance and supervision of the Board and/or Sub-Committee of Board on Risk Management. It meets at regular intervals to review the interest rate scenario, review of MCLR and Base Rate, liquidity position, product pricing for both deposits and advances, maturity profile of the assets and liabilities, demand for Bank funds, cash flows of the Bank and overall Balance Sheet Management.

Liquidity risk is measured and monitored through two approaches-Flow approach and Stock approach. Flow approach involves comprehensive tracking of cash flow mismatches and is done through preparation of Structural liquidity statement on a daily basis. Appropriate tolerance levels/prudential limits have been stipulated for mismatches in different time buckets. Under Stock Approach various balance sheet ratios are prescribed with appropriate limits. The compliance of ratios to the prescribed limits ensures that the Bank has managed its liquidity through appropriate diversification and kept it within the sustainable limit.

For measurement and monitoring of Interest rate risk, currency wise, both Traditional gap approach and Duration gap approaches are followed. The short-term impact of interest rate movements on NIM is worked out through "Earnings at Risk" approach taking into consideration Yield curve risk, Basis risk and Embedded Options Risk. The long-term impact of interest rate movements on Market Value of

Equity is also worked out through Duration Gap approach. The monthly interest rate sensitivity statement is reviewed by ALCO and Quarterly interest rate sensitivity is reviewed by RMC.

Stress testing of liquidity risk and interest rate risk is conducted on regular interval as per the RBI defined and internally defined stress scenarios. The results from internal Liquidity stress testing are used to draw contingency funding plan under different liquidity stress scenarios.

In addition to the above, bank is computing Liquidity Coverage Ratio (LCR) on daily as per latest Regulatory guidelines and is using it for assessing Liquidity risk. On a monthly basis LCR statement is reviewed by ALCO.

## **Market Risk Management:**

Market risk is the possibility of loss caused by adverse movements in the market variables. The Bank for International Settlements (BIS) defines market risk as "the risk that the value of 'on' or 'off' balance sheet positions will be adversely affected by movements in equity and interest rate markets, currency exchange rates and commodity prices". Thus, Market Risk is the risk to the bank's earnings and capital due to changes in the market level of interest rates or prices of securities, foreign exchange and equities, as well as the volatilities of those changes. The objective of market risk management is to assist the business units in maximizing the risk adjusted return by providing analytics driven inputs regarding market risk exposures, portfolio performance vis-à-vis risk exposures and comparable benchmarks. Following risks are managed under Market Risk.

- Interest Rate Risk
- Exchange Rate Risk
- Equity Price Risk

The market risk may also arise from changes in commodity prices and volatility. However, Bank does not have any exposure to commodity related markets.

Market Risk Management (MRM) Framework of the bank is as follows:

- a) Risk Identification: Setting a framework for identifying, assessing and managing market risk in order to provide clarity on various dimensions of risk identification and recognition to each of the business functions.
- b) Risk Measurement and Limits: Bank recognizes that no single risk statistic can reflect all aspects of market risk. Therefore, various statistical and non-statistical risk measures are used to enhance the stability of risk measurement of market risk. Together, these risk measures provide a more comprehensive view of market risk exposure than any single measure. Market risk is managed with various metrics viz. Value at Risk (VaR), Earnings at Risk (EaR), Modified duration (MD), PV01 Limits, Net Overnight Open Position Limits (NOOPL), Individual Gap Limit (IGL) and Aggregate Gap Limit (AGL) currency wise and also through sensitivity analysis. Stress testing is also conducted on a regular basis to monitor the vulnerability of the bank to extreme but plausible unfavourable shocks.
- c) **Risk Monitoring:** Bank monitors and controls its risk, using various internal and regulatory risk limits for trading book which are set based on economic scenario, business strategy, management experience and Bank's risk appetite. Rate scan is carried out to ensure that transactions are carried out at prevailing market rates.
  - **Risk Reporting:** Mid Office monitors treasury operations on day to day basis. A daily report and weekly summary note is placed to Chief Risk Officer and on monthly basis to ALCO. Stress testing is done for assessing market risk as per framework prescribed in Stress Test Policy and reported to ALCO on Quarterly basis.

Market risk management is governed by comprehensive board approved Policy on Market Risk Management and Stress Testing Policy to ensure that the risks spread across different activities

carrying an underlying market risk are within the stipulated risk appetite of the bank. All the policies are benchmarked with industry-best practices and RBI regulations. The risk reporting mechanism in the Bank comprises disclosures and reporting to the various apex level committees.

### **Operational Risk:**

Operational risk is now on the focus of intense interest among industry participants, regulators and other stake holders. The bank has put in place Operational Risk Management Frame work (ORMF) and Operational Risk Management systems (ORMS) to ensure effective governance, risk capture and assessment and quantification of operational risk. Operational risk is well managed by using appropriate qualitative & quantitative methods and established internal control systems in day to day management processes and adopting various risk mitigating strategies. The risk perceptions in various products / processes are critically analysed and corrective actions if required, are initiated.

Bank has implemented a web-based Operational Risk Management System to capture, measure, monitor and manage its operational risk.

#### Table DF-3

#### Credit Risk: General disclosures for all banks

#### **Qualitative Disclosures:**

### (a) Credit Risk Management:

Credit risk is defined as the possibility of losses associated with diminution in the credit quality of borrowers or counterparties.

#### Architecture:

In adherence with various guidelines and leading industry practices, the Bank has set up a robust governance structure for the management of credit risk, ensuring an adequate oversight, monitoring and reporting. The framework establishes the responsibilities of the board of directors.

The Bank has established a Board level sub-committee known as 'Risk Management Committee (RMC)' constituted in terms of RBI guidance note on Risk Management system.

# **Risk Management Committee (RMC):**

The RMC evaluates overall risks faced by the Bank and is responsible for the establishment of an effective system to identify measure, monitor and control risk and recommend to the Board for its approval, clear policies, strategy, risk appetite and credit standards.

The Board has delegated authority to the RMC for credit risk related responsibilities.

The committee oversees credit risk management and ensures that the principal credit risks facing the Bank have been properly identified and are being appropriately managed. The committee approves and periodically reviews the overall risk appetite and credit risk management strategy. The committee reviews the risk management policies, the Bank's compliance with risk management guidelines stipulated by the RBI.

The risk committee also reviews credit risk profile and any major development, internal and external, and their impact on portfolio and as a whole on the bank

#### **Credit Risk Management Committee (CRMC):**

CRMC deals with the issues relating to credit policy and procedures, and analyzes, manages and controls credit risk on a bank wide basis.

#### **Loan Review Management Committee: (LRMC):**

As a part of Credit risk management process, Loan Review Management Committee (LRMC), at Corporate Office, has been constituted to undertake review of borrowal accounts sanctioned by various Committees at CO and Zonal Credit Committee.

#### Definitions of past due and impaired (for accounting purpose)

Bank has adopted the definitions of the past due and impaired (for accounting purposes) as defined by RBI for Income Recognition and Asset Classification norms. Further, in line with RBI guidelines, the moratorium period, wherever granted, is factored in for the purpose of asset classification.

The policy of the bank for classifying bank's loan assets is as under:

Non Performing Asset (NPA): A non performing asset (NPA) is a loan or an advance where:

- Interest and/ or installment of principal remain overdue for a period of more than 90 days in respect of a term loan,
- The account remains 'out of order' in respect of an Overdraft/Cash Credit (OD/CC)
- The bill remains overdue for a period of more than 90 days in the case of bills purchased and discounted,
- The installment of principal or interest thereon remains overdue for two crop seasons for short duration crops
- The installment of principal or interest thereon remains overdue for one crop season for long duration crops

An OD/CC account is treated as 'out of order' if the outstanding balance remains continuously in excess of the sanctioned limit/drawing power for more than 90 days. In cases where the outstanding balance in the principal operating account is less than the sanctioned limit/drawing power, but there are no credits continuously for 90 days as on the date of Balance Sheet or credits are not enough to cover the interest debited during the same period, these accounts are treated as 'out of order'.

Non Performing Assets of the Bank is further classified in to three categories as under:

#### Sub standard Assets

A sub standard asset is one which has remained NPA for a period less than or equal to 12 months.

#### Doubtful Assets

An asset would be classified as doubtful if it has remained in the sub standard category for 12 months.

#### Loss Assets

A loss asset is one where loss has been identified by the bank or by internal or external auditors or the RBI inspection.

#### **Credit Risk Management Policy:**

The Bank has put in place the Credit Risk Management Policy (part of Credit Policy) and the same has been ported on Bank's intranet. The main objective of the policy is to ensure that the operations are in line with the expectation of the management and the strategies of the top management are translated into meaningful directions to the operational level. The Policy stipulates prudential limits on large credit exposures, standards for loan collateral, portfolio management, loan review mechanism, risk concentrations, risk monitoring and evaluation, provisioning and regulatory / legal compliance.

The Bank identifies the risks to which it is exposed and applies suitable techniques to measure, monitor and control these risks.

While the Board / Risk Management Committee of the Board devises the policy and fixes various

credit risk exposures, Credit Risk Management Committee implements these policies and strategies approved by the Board / RMC, monitors credit risks on a bank wide basis and ensures compliance of risk limits.

Bank considers rating of a borrower as an important tool to measure the credit risk associated with any borrower and accordingly implemented rating software.

Total gross credit risk exposures, Fund Based and Non-fund based separately.

(₹ in Million)

Particulars	Solo (Global)	Consolidated

#### Table DF - 4

# Credit Risk: disclosures for portfolios subject to the standardized approach Qualitative Disclosures:

The Bank uses ratings assigned by the seven Rating Agencies approved by the Reserve Bank of India namely a) CRISIL, b) ICRA, c) CARE, d) India Ratings, e) Brickworks f) Acuite and g) Infomerics for the eligible exposures such as Corporate, Public Sector Enterprises, and Capital Market Exposures etc. according to the Basel III framework. For overseas credit exposure, bank accepts rating of Standard &Poor, Fitch, & Moody's.

The Bank uses only publicaly available solicited ratings assigned by the above approved credit rating agencies for all eligible exposures, both on balance sheet and off balance sheet, whether short term or long term, in the manner permitted in the RBI guidelines on Basel III capital regulations.

For assets in the Bank's portfolio that have contractual maturity up to one year, short term ratings accorded by the chosen credit rating agencies are considered relevant. For other assets, which have a contractual maturity of more than one year, long term ratings accorded by the chosen credit rating agencies are considered relevant.

Long term/short term ratings issued by the chosen domestic credit rating agencies have been mapped to the appropriate risk weights applicable as per the standardised approach under Basel III capital regulations.

#### Use of multiple rating assessment:

- If there are two ratings accorded by chosen credit rating agencies that map into different risk weights, the higher risk weight are applied
- ➤ If there are three or more ratings accorded by chosen credit rating agencies with different risk weights, the ratings corresponding to the two lowest risk weights should be referred to and the higher of those two risk weights should be applied. i.e., the second lowest risk weight

# **Quantitative Disclosures:**

(b)The total credit risk exposure (Solo-Global) bifurcated after the credit risk mitigation under Standardized Approach is as under:

(₹ in Million)

Solo (Global)	Book Value	Risk Weighted value
Below 100% Risk weight	57,57,347.67	11,03,349.89
100% Risk weight	32,95,870.64	5,35,343.90
Above 100% Risk weight	9,58,762.26	8,92,603.24
Total	1,00,11,980.58	25,31,297.03

The total credit risk exposure (Consolidated) bifurcated after the credit risk mitigation under Standardized Approach is as under:

(₹ in Million)

Consolidated	Book Value	Risk Weighted value
Below 100% Risk weight	57,57,762.51	11,03,394.79
100% Risk weight	32,96,321.43	5,35,794.69
Above 100% Risk weight	9,58,828.34	8,92,768.45
Total	1,00,12,912.29	25,31,957.93

## Table DF-5 :Credit Risk Mitigation: disclosures for standardized approaches

#### **Qualitative Disclosures**

The Bank has put in place Credit Risk Mitigation & Collateral Management Policy (part of Credit Policy) with the primary objective of a) Mitigation of credit risks & enhancing awareness on identification of appropriate collateral taking into account the spirit of Basel III / RBI guidelines and (b) Optimizing the benefit of credit risk mitigation in computation of capital charge as per approaches laid down in Basel III / RBI guidelines.

The Bank generally relies on Risk Mitigation techniques like Loan participation, Ceiling on Exposures, Escrow mechanism, Forward cover, higher margins, loan covenants, Collateral and insurance cover.

Valuation methodologies are detailed in the Credit Risk Management Policy (part of Credit Policy).

# Eligible collateral for which CRM benefit taken for Computation of Capital Charge as per RBI guidelines:

The following collaterals are recognized for availing CRM benefit for Computation of Capital Charge:

- i) Cash (as well as certificates of deposit or comparable instruments, including fixed deposit receipts, issued by the lending bank) on deposit with the bank, which is incurring the counterparty exposure.
- ii) Gold: Gold would include both bullion and jewellery. However, the value of the collateralized jewellery should be benchmarked to 99.99 purity.
- iii) Securities issued by Central and State Governments
- iv) Kisan Vikas Patra and National Savings Certificates provided no lock-in period is operational and if they can be encashed within the holding period
- v) Life insurance policies with a declared surrender value of an insurance company which is regulated by an insurance sector regulator
- vi) Debt securities rated at least BBB (-)/PR3/P3/F3/A3
- vii) Units of Mutual Funds

#### Main types of guarantor counterparty and their creditworthiness

The Bank considers credit protection in terms of the guarantees which are direct, explicit, irrevocable and unconditional. The bank takes into account such credit protection in calculating capital requirements

Only guarantees issued by entities with a lower risk weight than the counterparty will lead to reduced capital charges, since the protected portion of the counterparty exposure is assigned the risk weight of the guarantor, whereas the uncovered portion retains the risk weight of the underlying counterparty

Credit protection given by the following entities is recognised as counterparty Guarantor:

- (i) Sovereigns (Central and State Governments)
- (ii) Sovereign entities (including ECGC, NCGTC and CGTMSE)
- (iii) Banks with a lower risk weight than the counterparty

All types of securities eligible for mitigation are easily realizable financial securities. Hence, presently no limit / ceiling has been prescribed to address the concentration risk in credit risk mitigants recognized by the Bank.

The Bank uses the comprehensive approach in capital assessment. In the comprehensive approach, when taking collateral, the Bank calculates the adjusted exposure to a counterparty for capital adequacy purposes by netting off the effects of that collateral. The Bank adjusts the value of any collateral by a haircut to take into account possible future fluctuations in the value of the security occasioned by market movements.

## **Quantitative Disclosures**

For each separately disclosed credit risk portfolio (Solo-Global / Consolidated), the total exposure (after, where applicable, on- or off balance sheet netting) that is covered by eligible financial collateral after the application of haircuts:

(₹ in Million)

Type of Exposure	Eligible financial Collateral	Guarantees			
Gross Credit Risk Exposures	Gross Credit Risk Exposures				
Fund Based					
Loans and Advances	5,31,186.32	4,75,555.84			
Investments	0.00	0.00			
Other Assets	0.00	0.00			
Total Fund Based	5,31,186.32	4,75,555.84			
Non Fund Based including					
contingent credit, contracts and

Securitization: disclosure for standardized approach

<b>Qualitative Disclosures:</b> The Bank has not undertaken any securitization activity.		
Quantitative Disclosures:	NIL	

# Table DF – 7 Market risk in trading book

#### **Market Risk:**

Market risk is the possibility of loss caused by changes in the market variables. The Bank for International Settlements (BIS) defines market risk as "the risk that the value of 'on' or 'off' balance sheet positions will be adversely affected by movements in equity and interest rate markets, currency exchange rates and commodity prices". Thus, Market Risk is the risk to the bank's earnings and capital due to changes in the market level of interest rates or prices of securities, foreign exchange and equities, as well as the volatilities of those changes. The objective of market risk management is to assist the business units in maximizing the risk adjusted rate of return by providing analytics driven inputs regarding market risk exposures, portfolio performance vis-à-vis risk exposures and comparable benchmarks. Following risks are managed under Market Risk.

- Interest Rate Risk
- Exchange Rate Risk
- Equity Price Risk

The market risk may also arise from changes in commodity prices and volatility. However, Bank does not have any exposure to commodity related markets.

Market Risk Management (MRM) Framework of the bank is as follows:

- a) **Risk Identification:** Setting a framework for identifying, assessing and managing market risk in order to provide clarity on various dimensions of risk identification and recognition to each of the business functions.
- b) Risk Measurement and Limits: Bank recognizes that no single risk statistic can reflect all aspects of market risk. Therefore various statistical and non-statistical risk measures are used to enhance the stability of risk measurement of market risk. Market risk is managed with various metrics viz. Value at Risk (VaR), Earnings at Risk, Modified duration, PV01 Limits, Net Overnight Open Position Limits (NOOPL), Individual Gap Limit (IGL) and Aggregate Gap Limit (AGL) currency wise and also through sensitivity analysis. Stress testing is also conducted on a regular basis to monitor the vulnerability of the bank to extreme but plausible unfavourable shocks.
- c) Risk Monitoring: Bank monitors and controls its risk, using various internal and regulatory risk limits for trading book which are set based on economic scenario, business strategy, management experience and Bank's risk appetite. Rate scan is carried out to ensure that transactions are executed and revalued at prevailing market rates.
- d) Risk Reporting: Monitoring of Treasury operations is done by Mid Office and a daily report and weekly summary report is put up to Chief Risk Officer. Capital charge on account of Market Risk is computed and reported to ALCO on monthly and Board on quarterly basis. Stress testing is done for assessing market risk by following assumptions prescribed in Stress Test Policy and reported to ALCO on Quarterly basis.

Market risk management is governed by comprehensive board approved market risk management policy, Integrated Treasury Management Policy, Stress testing and

Derivative Policy to ensure that the risks spread across different activities carrying an underlying market risk are within the stipulated risk appetite of the bank. All the policies are benchmarked with industry-best practices and RBI regulations. The risk reporting mechanism in the Bank comprises disclosures and reporting to the various apex level committees.

#### **Quantitative Disclosures:**

The capital requirements (Solo-Global / Consolidated) for:

(₹ in Million)

Particulars	Solo (Global)	Consolidated
Interest rate risk	8,700.50	8,700.50
Foreign exchange risk	90.00	90.00
Equity position risk	3,464.95	3,598.44
Total	12,255.45	12,388.94

# Table DF – 8 Operational Risk

#### **Qualitative Disclosures:**

Operational risk is defined as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. This definition includes legal risk, but excludes strategic and reputational risk.

Operational risk is now on the focus of intense interest among industry participants, regulators and other stake holders. The bank has put in place Operational Risk Management Frame work (ORMF) and Operational Risk Management systems (ORMS) to ensure effective governance, risk capture and assessment and quantification of operational risk exposure. Operational risk is well managed by using appropriate qualitative & quantitative methods and established internal control systems in day to day management processes and adopting various risk mitigating strategies. The risk perceptions in various products / processes are critically analysed and corrective actions if required, are initiated.

Bank has implemented a sophisticated web-based Operational Risk Management System to capture, measure, monitor and manage its operational risk exposure. Bank has built up internal loss data base for more than 10 years.

Capital charge for Operational Risk is computed as per the Basic Indicator Approach.

### **Quantitative Disclosures**

The average of the gross income, as defined in the Basel III Capital regulations, for the previous 3 years i.e. is considered for computing the capital charge. The required capital is ₹ 23771.48 Million (Consolidated).

#### Table DF - 9

# Interest Rate Risk in the Banking Book (IRRBB)

### **Qualitative Disclosures:**

IRRBB refers to the potential adverse financial impact on the Bank's banking book from changes in interest rates.

The interest rate risk is measured and monitored through two approaches:

(i) Earning at Risk (Traditional Gap Analysis):

The immediate impact of the changes in the interest rates on net interest income of the bank is analyzed under this approach.

(ii) Economic Value of Equity (Duration Gap Analysis):

Modified duration of assets and liabilities is computed separately to finally arrive at the modified duration of equity. This approach assesses impact on economic value of equity by assuming parallel shift in the yield curve for a given change in the yield. Impact on the Economic Value of Equity is also analyzed for a 200 bps rate shock as required by RBI. Market linked yields are used in the calculation of the Modified Duration.

The changes in market interest rates have earnings and economic value impacts on the bank's banking book. Thus, given the complexity and range of balance sheet products, IRR measurement systems are used that assess the effects of the rate changes on both earnings and economic value. Techniques followed are simple maturity (fixed rate) and repricing (floating rate) gaps and duration gaps based on current on-and-off-balance sheet positions, to a little higher technique that incorporate assumptions on behavioural pattern of assets, liabilities and off-balance sheet items and can easily capture the full range of exposures against basis risk, embedded option risk, yield curve risk, etc.

The analysis of bank's Interest Rate Risk in Banking Book (IRRBB) is done for Global position. Analysis note on the same on a monthly basis is placed to ALCO.

#### **Quantitative Disclosures:**

The impact on earnings and economic value based on interest rate shocks are given below:-

- i) Earnings at Risk for 25 bps interest rate shock as on for one year time horizon is
   (-) ₹2099 Million
- ii) Change in Economic Value of Equity for 200 bps interest rate shock in Banking Book is ₹ 732140 Million (IRRBB)

# DF-10: General Disclosure for exposures related to Counterparty Credit Risk:

Counterparty Credit Risk is the risk that the counterparty to a derivative transaction can default before the final settlement of the transaction's cash flow. The Bank sets limits as per the norms on exposure stipulated by RBI for both fund and non fund based facilities including derivatives. Limits are set as a percentage of the capital funds and are monitored on regular basis. For corporates the derivatives limits are assessed and sanctioned in conjunction with regular credit limit as part of regular appraisal.

All the Derivative transactions with the Counterparty are evaluated as per Board approved Derivative Policy of the Bank.

The derivative exposure calculated using Current Exposure Method (CEM) and outstanding as on 31.03.2021 is given below:

(₹ in Million)

Derivatives	Notional Principle	Current Credit Exposure(+ve MTM)	Current Exposure
Forward Contracts	25,48,568.44	15,665.65	63,788.53
Interest Rate Swaps	0.00	0.00	0.00

**Table DF-14: Full Terms and Conditions of Regulatory Capital Instruments** 

	Terms a	and conditions for Basel III compliant Bonds
S.No	Particulars	Additional Tier 1 Bonds Series II
1	Security Description	8.44% Listed, Unsecured, Subordinated, Non-Convertible, Fully
		Paid Up, Taxable, Perpetual, Basel III Compliant Additional Tier 1
		Bonds (AT 1) in the nature of Debentures of Rs.10Lakh each
		aggregating to Rs.1048 Crore
2	Security offered through	Private Placement
3	Tax status	Taxable
4	Date of opening of the issue	07/12/2020
5	Date of closing of the issue	07/12/2020
6	Series	Series II
7	ISIN Code	INE562A08057
8	Face Value per instrument	Rs.10,00,000
9	Paid up value per instrument	Rs.10,00,000
10	Issue Size	Rs. 1048 Crore
11	Date of allotment	08/12/2020
12	Date of maturity	Perpetual instruments
13	Call Option	(i) Issuer Call: The issuer, with prior approval of RBI may at its
		sole discretion, having notified the Trustee not less than 21

calendar days prior to the date of exercise of such issuer call (Which notice shall specify the date fixed for exercise of the issuer Call (The "Issuer call date"), may exercise a call option on the outstanding Bonds.

The Issuer Call, which is discretionary, may or may not be exercised on the fifth anniversary from the Deemed Date of Allotment i.e. the fifth Coupon Payment Date or on any Coupon Payment Date thereafter.

(ii)Tax call: If a Tax Event (As described below) has occurred and continuing, then the issuer may, having notified the Trustee not less than 21 calendar days prior to the date of exercise of such Tax Call or Variation (Which notice shall specify the date fixed for exercise of the Tax Call or Variation "Tax Call Date"), may exercise a call on the Bonds or substitute the Bonds or vary the terms of the Bonds so that the Bonds have better classification. A Tax event has occurred if, as a result of any change in, or amendment to, the laws affecting taxation or regulations or rulings promulgated there under in India or any change in the official application of such laws, regulations or rulings; the Issuer will no longer be entitled to claim a deduction in respect of computing its taxation liabilities with respect to coupon on Bonds. The exercise of Tax Call by the Issuer is subject to requirements set out in the applicable RBI Guidelines (as defined below). RBI will permit the Issuer to exercise the Tax Call only if the RBI is convinced that the issuer was not in a position to anticipate the Tax Event at the time of issuance of the Bonds.

(iii) Regulatory Call: If a Regulatory Event (As described below) has occurred and continuing, then the issuer may, having notified the Trustee not less than 21 calendar days prior to the date of exercise of such Regulatory Call or Variation (Which notice shall specify the date fixed for exercise of the Regulatory Call or Variation "Regulatory Call Date"), may exercise a call on the Bonds and replace with the instrument with better regulatory classification or lower coupon with same regulatory classification with prior approval of RBI or substitute the Bonds or vary the terms of the Bonds so that the Bonds have better classification.

A Regulatory event is deemed to have occurred if there is a downgrade of the Bonds in regulatory classification e.g. Bonds are excluded from the regulatory Tier 1 Capital of the Issuer. The exercise of Regulatory Call by the Issuer is subject to requirements set out in the applicable RBI Guidelines (as defined below). RBI will permit the Issuer to exercise the Regulatory Call only if the RBI is convinced that the issuer was not in a position to anticipate the Regulatory Event at the time of issuance of the Bonds.

13	Call Option	(i) Issuer Call: The issuer, with prior approval of RBI may at its sole discretion, having notified the Trustee not less than 21 calendar days prior to the date of exercise of such issuer call (Which notice shall specify the date fixed for exercise of the issuer Call (The "Issuer call date"), may exercise a call option on the outstanding Bonds.  The Issuer Call, which is discretionary, may or may not be exercised on the fifth anniversary from the Deemed Date of Allotment i.e. the fifth Coupon Payment Date or on any Coupon Payment Date thereafter.
		(ii)Tax call: If a Tax Event (As described below) has occurred and continuing, then the issuer may, having notified the Trustee not less than 21 calendar days prior to the date of exercise of such Tax Call or Variation (Which notice shall specify the date fixed for exercise of the Tax Call or Variation "Tax Call Date"), may exercise a call on the Bonds or substitute the Bonds or vary the terms of the Bonds so that the Bonds have better classification. A Tax event has occurred if, as a result of any change in, or amendment to, the laws affecting taxation or regulations or rulings promulgated there under in India or any change in the official application of such laws, regulations or rulings; the Issuer will no longer be entitled to claim a deduction in respect of computing its taxation liabilities with respect to coupon on Bonds. The exercise of Tax Call by the Issuer is subject to requirements set out in the applicable RBI Guidelines (as defined below). RBI will permit the Issuer to exercise the Tax Call only if the RBI is convinced that the issuer was not in a position to anticipate the Tax Event at the time of issuance of the Bonds.  (iii) Regulatory Call: If a Regulatory Event (As described below) has occurred and continuing, then the issuer may, having notified the Trustee not less than 21 calendar days prior to the date of exercise of such Regulatory Call or Variation (Which notice shall specify the date fixed for exercise of the Regulatory Call or Variation "Regulatory Call Date"), may exercise a call on the Bonds and replace with the instrument with better regulatory classification or lower coupon with same regulatory classification with prior approval of RBI or substitute the Bonds or vary the terms of the Bonds so that the Bonds have better classification.  A Regulatory event is deemed to have occurred if there is a downgrade of the Bonds in regulatory classification e.g. Bonds are excluded from the regulatory Tier 1 Capital of the Issuer. The exercise of Regulatory Call by the Issuer is subject to requ

		only if the RBI is convinced that the issuer was not in a position to anticipate the Regulatory Event at the time of issuance of the Bonds.

#### **Table DF-15: Disclosure Requirements for Remuneration**

-----Not applicable-----

As per RBI Master Circular on Basel III, this table is only applicable to all private sector and foreign banks operating in India.

#### Table DF-16: Equities-Disclosure for Banking Book Positions

Investments are classified at the time of purchase into Held for trade (HFT), Available for Sale (AFS) and Held to Maturity (HTM) categories in line with the RBI master circular on Prudential Norms for classification, valuation and operation of investments portfolio by Banks. Investments that are held principally for sale within a short period are classified as HFT securities. Investments that the Bank intends to hold till maturity are classified under the HTM category. Investments in the equity of subsidiaries/joint ventures are categorized as HTM in accordance with the RBI guidelines. All other investments are classified as AFS securities.

Equity investments under the HTM category are carried at acquisition cost. Equity investments under the banking book are the Bank's investments in subsidiaries and associates. As on 31.03.2021, Book value of equity shares under Banking book is Rs. 2521.02 million.

Table DF 17- Summary comparison of accounting assets vs. leverage ratio exposure	
measure	(Rs. in Million)
Item	
Total consolidated assets as per published financial Statement	62,69,196.23
Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation	(1,050.00)
Adjustment for fiduciary assets recognised on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure	0.00
Adjustments for derivative financial instruments	63,788.53
Adjustment for securities financing transactions (i.e. repos and similar secured lending)	1,254.41
Adjustment for off-balance sheet items (i.e. conversion to credit equivalent amounts of off- balance sheet exposures)	3,89,028.77
Other adjustments	(1,092.90)
Leverage ratio exposure	67,21,125.04

	DF 18 – Leverage ratio common disclosure template	(Rs. in million)
	On-balance sheet exposures	Consolidated
1	On-balance sheet items (excluding derivatives and SFTs, but including collateral)	61,80,196.23
2	(Asset amounts deducted in determining Basel III Tier 1 capital)	(2,142.90)
3	Total on-balance sheet exposures (excluding derivatives and SFTs) (sum of lines 1 and 2)	61,78,053.33
	Derivative exposures	
4	Replacement cost associated with all derivatives transactions (i.e. net of eligible cash variation margin)	15,665.65
5	Add-on amounts for PFE associated with all derivatives transactions	48,122.88
6	Gross-up for derivatives collateral provided where deducted from the balance sheet assets pursuant to the operative accounting framework	0.00
7	(Deductions of receivables assets for cash variation margin provided in derivatives transactions)	0.00
8	(Exempted CCP leg of client-cleared trade exposures)	0.00

	DF 18 – Leverage ratio common disclosure template	(Rs. in million)
9	Adjusted effective notional amount of written credit derivatives	0.00
10	(Adjusted effective notional offsets and add-on deductions for written credit derivatives)	0.00
11	Total derivative exposures (sum of lines 4 to 10)	63,788.53
	Securities financing transaction exposures	
12	Gross SFT assets (with no recognition of netting), after adjusting for sale accounting transactions	90,254.41
13	(Netted amounts of cash payables and cash receivables of gross SFT assets)	0.00
14	CCR exposure for SFT assets	0.00
15	Agent transaction exposures	0.00
16	Total securities financing transaction exposures (sum of lines 12 to 15)	90,254.41
	Other off-balance sheet exposures	
17	Off-balance sheet exposure at gross notional amount	13,10,373.89
18	(Adjustments for conversion to credit equivalent amounts)	(9,21,345.12)
