1	10	Bid Security & Cost of Bid Document	Earnest Money Deposit/Bid Security	Being a CPSU, we kindly request for exemption for the submission of the EMD through BG, instead, we will submit a Bid security declaration	No Change, Please refer RFP terms and Conditions. As bank follows Government of India Guidelines, hence bank may exempt EMD, after submission of supporting documents in this regard.
2	13	2) A)1) Bandwidth	* - Based on the utilization of links, service providers identified through open tender will be intimated to upgrade the links to next bandwidth based on the bank's requirement. Upgradation of links to be completed within 1 week from the date of receiving request from bank. Contract Period mentioned above for each bandwidth is only to arrive uniqueness in the reverse auction price amongst the bidders. Bank reserves the right to avail internet links of any of the aforementioned bandwidth without having any limitations on time period subject to the contract period of 3 years.	At any time If the bank would like to upgrade the link based on the utilization more than 1 Gbps, the On-premises DDoS also should have the capacity to do mitigation. Please provide the future scalability of the on-prem solution.	No Change, Please refer RFP terms and Conditions. It is clarified that, bidder has to provide the links and DDOS device as per RFP requirement.
3	13	2) A)4) Topology and Media	The service provider should provide the links on fiber between the service provider routers and Bank router on fiber termination. The successful bidders are encouraged to have a standby local cable laid and kept without connections between the terminal equipment and bank router for redundancy.	Please confirm the ISP to factor the commercials for both active and passive x connects in existing bank's data centres @Chennai and DR Site @Mumbai.	It is clarified that, mentioned clause is self-explanatory. Commercial pertaining to cross connect (active and passive) falls under bidder scope.
4	13	1) Scope of the Project	1) Scope of the Project · The name of the assignment is "Providing	Kindly provide full address of DC and DR sites for feasibility purpose	Indian Bank DC Site TATA COMMUNICATIONS BUILDING

				by customer. Inbuilding internal cable routing in false ceiling and under POP wall will be in customer scope of work	service provider routers and Bank router on fiber termination. The successful bidders are encouraged to have a standby local cable laid and kept without connections between the terminal equipment and bank router for redundancy. In this regard, cable laying falls under bidder's scope. However, Permission/access at site for laying of cable & feasibility check to link delivery will be arranged by bank. Please refer RFP terms and Conditions
35	Additional	NA	Power and earthing	RACK Space, Proper power supply and earthing arrangement for the bidder network devices will be arranged and maintained by customer.	Yes, It is clarified that RACK Space, Proper power supply and earthing arrangement for the bidder network devices will be arranged and maintained by bank.
36	Additional	NA	Acceptance criteria	We request to please define the acceptance criteria	It is clarified that, Bank will provide the acceptance for the delivered link as per RFP terms and conditions like latency, packet drop etc.
37	Additional	NA	First level troubleshooting	In case of connectivity down, FLT will be done by the customer spoke available at site. No downtime will be attribute to bidder incase the local person is not available at site or on site access is not available for the bidder engineer to check after the FLT.	No Change, Please refer RFP terms and Conditions. However, downtime may be exempted in case issue is attributable to bank, based on submission of relevant document by bidder & bank discretion.
38	Additional	NA	SLA calculation	SLA/downtime calculation will be done basis the trouble ticket raised by the customer with the bidder central helpdesk. Bidder will share the monthly uptime report with the customer where all the SR will be captured along with detailed RFO/RCA.	It is clarified that, SLA calculation will depend on various parameters like uptime based on internal NMS tool, raised tickets etc.

Clarification for the RFP for Providing Internet Connectivity with DDOS Services
(RFP Ref. No. CO/ITD/CNW/1883/R1/2022-23 dated 01/11/2022)

Date: - 22//11/2022

S.No	Page no in RFP	RFP Point no/Title	Details provided in RFP	Query/Changes Requested	Bank's Reply
39	Additional	NA	SLA Exemption	NO SLA penalty will be applicable on bidder incase the location is down due to 1) Power issue at customer end. 2) Improper earthing at site. 3) Equipment damaged due to water seepage or stolen from the location. 4) Access not available at site for the bidder engineer to check the issue. 5) LC not available at site. 6) Any condition which is beyond the control of bidder.	No Change, please refer RFP terms and Conditions. However, SLA may be exempted incase issue is attributable to bank, based on submission of relevant document by bidder & bank discretion.
40	Additional	NA	NA	What are the critical services in customer network (Web/Video/Audio/E-Commerce/SSL/E-Mail etc.)	It is clarified that, services running over internet links are critical in nature.
41	Additional	NA	NA	Is the layer 7 DDoS Protection required for Tata Link or All link at IB locations?	It is clarified that, layer 7 DDoS Protection required for the links provided by respective ISP's.
42	Additional	NA	In the provided specifications there is no mention on the physical interfaces requirement required for the On-premise device. Request the department to consider the provided clause	Considering the requirement of Bandwidth mentioned on the RFP, we request the department to include the clause " The proposed hardware appliance should not be a licensed feature of a Firewall, Load Balancer or any Reverse proxy solution and should support at least 6 nos of 1G copper interfaces from day-1 & should have scalability by 2 x 1/10G SFP+ interfaces"	Not considered, Please refer RFP terms and Conditions
43	Additional	NA	The solution must be able to protect all internet protocols used including http, https, dns, smtp, ftp, ipsec. Necessary DDOS detection and mitigation solution to decrypt and inspect the encrypted packets should be provided as part of the solution.	Zero day DDoS attacks are widely seen in the industry and the proposed solution should also have capability to mitigate such attacks as well, hence we request the department to rephrase the clause as " The solution must be able to protect all internet protocols used including http, https, dns, smtp, ftp, ipsec. Necessary DDOS detection and mitigation solution to	No Change. It is clarified that, solution must be able to protect all internet protocols and all type of attacks.

Clarification for the RFP for Providing Internet Connectivity with DDoS Services

				decrypt and inspect the encrypted packets should be provided as part of the solution. The solution should also have capability to mitigate Zero day attacks and should have a mechanism to configure real time signature within 20 seconds to mitigate such attacks"	
44	Additional	NA	End user response times must not be adversely impacted during business-as-usual with business-as-usual response times being maintained.	Significant latency on the end user response time can impact the production, hence we request the department to amend the clause as " End user response times must not be adversely impacted during business-as-usual with business-as-usual response times being maintained and the DDoS device should have latency of < 70 micro seconds"	It is clarified that, maximum capping for latency is less than 200ms. At any time latency is observed to be more than 200ms, same may be treated as link outage till the latency is restored to less than 200ms.
45	Additional	NA	Additional Point	To ensure continuity of the production traffic the system should have a means to bypass the traffic when the device goes down, hence we request the department to consider the provided clause "System should Fail-Open or should bypass the traffic in case of Hardware failure internally or Externally using Bypass Switch"	No Change, Please refer RFP terms and Conditions
46	Additional	NA	Additional Point	For effective mitigation of malicious traffic we request the department to consider the provided clause " The DDoS solution on cloud should have capability to accept signalling from on-premise DDoS device for effective and fast mitigation"	Not Considered, Please refer RFP terms and Conditions
