

AMENDMENT CORRIGENDUM 2.0

S.No	Page No.	Para No.	DESCRIPTION	Bidder Query	Amendment Corrigendum 2.0
49	34	1.9.21 (n)	<p>The network connectivity for the CMS solution i.e., leased lines, broadband, MPLS technology and dual SIM VPN including its hardware & software shall be owned by the bidder. The MSP must size the same considering the CMS solution and upgrade the same if required, in future without any extra cost to the Bank.</p>	<p>Does bank support to get the Broadband/MPLS connectivity? We request bank to consider Dual SIM connectivity instead of Broadband and MPLS. As per new guidelines Broadband and MPLS will require end site address proof and some other related documents of bank.</p> <p>Would require power consumption details for supplying MCB</p> <p>Please clarify if we can utilize a dual Sim Router to connect to our Comand center and wherever it is required where there is no network connection we</p>	<p>“The network connectivity for the CMS Solution should be provided through private MPLS connectivity (leased line /RF/ dual SIM VPN Connectivity) including its hardware and software, shall be owned by the bidder. Dual SIM VPN connectivity should be least preferred (wherever leased line / RF is not feasible). It is bidder responsibility to maintain surveillance video quality. If degraded, connectivity should be improved/ replaced. The MSP must size the same considering the CMS solution and upgrade the same if required, in future without any extra cost to the Bank.”</p>
